## ■ EXPERIENCE

### DevOps Engineer • TrustSoft s.r.o.

Present

Operations team, keeping infrastructure reliable and improving it. I run the Grafana & Prometheus monitoring stack on Kubernetes, maintain internal AI infrastructure, and build event-driven notification software that reacts to signals from across our applications.

Kubernetes · Grafana · Prometheus · AI Infrastructure

### Freelance Web Developer • Vegan Bánh Mì

Project

Built the website for a vegan Vietnamese restaurant in Czechia, together with a friend. Modern responsive design, optimized performance, and an SEO-friendly build.

Next.js · Mantine · React · TypeScript

## ■ SKILLS

### Infrastructure that scales

Kubernetes, Terraform, and AWS set up to grow with load and recover from failure on their own.

AWS · Kubernetes · Docker · Terraform · Terragrunt · Linux

### Observability you can act on

Grafana dashboards and Prometheus alerting that surface issues before your users feel them.

Grafana · Prometheus · Alertmanager · Loki · CloudWatch

### Automated delivery

CI/CD pipelines and GitOps so every change ships the same, repeatable way.

Git · GitLab CI · GitHub Actions · Jenkins · Ansible · ArgoCD

### Web apps, front to back

React and TypeScript on the front, Node or Spring Boot behind, delivered as one coherent product.

React · TanStack · TypeScript · JavaScript · Node.js · Java · Spring Boot · PostgreSQL
